

Ventus b/16.6

FLIGHT MANUAL

3.3 Emergency Canopy Jettison

The procedure for jettisoning the canopy is as follows:

1. Pull back the red locking knob on the left on the canopy frame and raise canopy.
2. Pull back the red knob on the right hand side below the canopy frame.
3. Throw off the canopy.

The canopy coaming frame of the fuselage is made of fiberglass laminates, strong and without sharp edges, so the pilot may use it for support when bailing out.
